Re: HCI Comments in concern of AMG Technology Kansas Project Central

To Whom It May Concern:

Home Communications, Inc. (HCI) is responding to the "AMG Technology (NexLink) Kansas Project Central" (AMG) application in Saline County.

HCI currently serves a portion of the AMG application proposed service area as demonstrated on the attached map. This area is just east of the City of Salina. The HCI service area is shaded in yellow. The AMG application is indicated by the colored lines on the map. As shown, AMG is requesting funding in an area that HCI already provides 1000/100mbps available service. In addition, HCI is fully capable of providing 10 Gig symmetrical services in the future.

HCI completed this privately funded fiber to the home build in first quarter of 2022 and it was reported on the June 30, 2022 FCC 477 filing. There are 93 locations in the AMG application that overlap HCI service area. HCI has 63 customers in this overlapping area. All 93 locations have HCI service available at competitive rates. HCI actively advertises in this area and offers ACP and Lifeline resources to all customers. We have included below a listing of the 63 addresses we currently serve.

HCI files all data with the FCC 477 filing under the name of Home Enterprises, Inc. Home Communications is 100% owned by Home Enterprises, Inc.

All of HCI's facilities are fiber to the home. These are 100% owned physical facilities buried to protect against weather. In addition, these direct connections to the home are not reliant on line of sight and have no speed limitations.

HCI provides this information to demonstrate that, if funded, a portion of the AMG proposed project will duplicate a privately funded fiber facility where HCI already provides speeds of 1000/100mbps at competitive rates.

Sincerely,

A handwritten signature in black ink that reads 'Becki Regier'.

Becki Regier, CEO  
Home Communications, Inc.
