Dear SCTelcom Administration,

We are very excited by the news that SCTelcom is applying for funds to build fiber in rural Harper County. My brother lives at 344 NW 80 Road and I am partial owner of the property. Currently there is no such provider and I struggle with getting in contact with him. He is a farmer and the cell service is scanty. If fiber based internet were available it would be very beneficial to me in contacting him and doing the farm work that needs to be done.

Fiber based Internet would help our household and business because parts could be ordered online, weather reports and market reports would be available as well as contact could be made with me as owner of the property that would now have access to fiber based internet.

Finally, during the lockdown during the pandemic in 2020 we wished we had better broadband so that we could communicate. It is extremely isolating if fiber based internet is not available.

It is time to solve the “last mile of fiber” issues.

Ila Zimmerman
