Having broadband expand into this area would greatly improve residents access to internet. Currently, many of us must construct towers on our property if we are to reach any service provider at all. Our recent radio internet equipment installation cost us a little over \$4,000.00. Many who live in rural homes are not fortunate enough to be able to afford that upfront expense. And, not everyone can achieve connectivity even if they can install a tower. After installing this equipment and contracting with Kwikom for service for \$105/month, we have been able to achieve 35mbs download and 7mbs upload speeds on off-peak times. However, these slow significantly during high-traffic times of day. While these speeds are serviceable, the latency has caused issues with lag and fade out on Zoom conferences any time of day. We aren't within the proposed service area for Charter's Miami Project 4, we are about 3 neighbors away from the southwest corner near 335th and Somerset. But, with the installation of this project, we have hope for future projects that may reach us. Thanks for giving us the opportunity to comment!
