Please provide your response to the public comments received in the text box below:

**In response to the public comment, challenge #0197, regarding AMG/Nextlink’s claim that Cunningham Communications’ Mitchel Application covers territory already served by 100 Mbps / 20 Mbps, Cunningham Communications submits the following.**

**Our team at Cunningham Communications prepared for our Capital Project Fund application by conducting a competitive analysis and collecting community support letters. All of which provided evidence that at the time of our application, AMG/Nextlink was not able to provide 100 Mbps / 20 Mbps. Our support letters received from public officials and community leaders certify that, to their knowledge, none of the areas included in our application have the fast, reliable broadband the county needs to move forward with their goal toward equitable, high-speed broadband for all residents and businesses.**

**As AMG/Nextlink did not provide any additional public evidence but the map showing that they claim to provide up to 100 Mbps / 20 Mbps in some parts of our proposed funded service area, we believe that we have provided the Kansas Office of Broadband Development the ample evidence required to contest any claims of service in the proposed service area and thus our proposed funded service area as represented in our CunninghamCommunications\_MitchellCounty meets the eligibility of “unserved”.**
