Please provide your comments in the text box below:

**My wife and I have lived at 2505 HWY 183, LaCrosse, KS for 15 years and we have never had robust broadband internet service. Our current internet speeds are 1.23 Mbps download and 2.13 Mbps upload. There are no other options for broadband internet service in our area. Our current internet speeds limits us in using streaming applications, such as Netflix, hulu, etc., and our internet service can be unreliable.**

**High speed fiber broadband would provide us, and other rural Rush County residents, with the benefits of reliable internet as found in the larger urban areas. Having reliable internet service is more of a necessity than a luxury, whether it be used for communication purposes, employment, entertainment, or transmitting medical related information, such as the monitoring of my CPAP device. Robust Broadband services are needed in rural Rush County. I fully support GBT's application to expand broadband to connect the residents and businesses in rural Rush County.**
