Internet speeds tied to upload and downloading speeds is critically important to rural america and we are no different. In today's modern age more and more services are being tied to internet services from Banking, Business, and even submitting tax returns to just name a few. As we work to work to navigate around high fuel costs, working from home and taking care of business at home is more necessary. Our local provider (GBT) is doing a wonderful job in getting services to the customers in their territory, but this comes at a huge cost for a cooperative with limited membership. In addition we need other providers to get service extended to the homes in areas that are not receiving adequate service regardless of internet speed (namely AT&T).

Upload supporting documentation - multiple files should be submitted as a .ZIP file.
