I am sharing concerns about the project:

Proposes to serve an area that already has service

Please provide your comments in the text box below:

Eagle Broadband Investments, LLC dba Vyve Broadband currently provides broadband internet service to the City of Ottawa at speeds exceeding 100 Mbps down and 20 Mbps up, with gigabit service available to almost the entire proposed area. Please find attached a shapefile of our existing service footprint, a point shapefile indicating served locations, as well as photographed speed tests evidencing our current level of service. We believe that the city is already served per the grant program's rules, and that the use of grant funds towards applicant's project would result in considerable overbuilding. Please reach out to us should you have any questions or concerns.

Upload supporting documentation - multiple files should be submitted as a .ZIP file.
