I am a customer of Haviland Broadband and I am in favor of higher internet speed to help with my work at home capabilities. Both my husband and I work from home so the increased speeds are very important. Besides working from home we have multi devices which we use to stream programs. Our current speed of 20 MBPS is no longer satisfactory at what we need to have for work and for our entertainment. I have contacted Haviland Broadband numerous times about increased internet speeds and because we live in a rural area and with out improvements to their infrastructure they are not able to provide what we need.

Upload supporting documentation - multiple files should be submitted as a .ZIP file.
