I am providing response comments related to the following application (choose one):	IdeaTek_Kingman4
I am responding to the concern that this project:	Proposes to serve an area that already has service
Please describe:	In response to public comment 0216 - Cox claims that they are currently serving this area with speeds of 100/20.

Please provide your response to the public comments received in the text box below:	Cox claims that they are currently serving this area with speeds of 100/20. The evidence they provided is proprietary, making it difficult to speak to this claim. IdeaTek has not seen any data that indicates Cox is serving residents within this proposal. IdeaTek does not believe this claim to be true, but if they are serving this area with 100/20, it is important to note that the CPF guidelines define underserved as “a designated geographic area in which households or businesses are without a fixed, terrestrial connection supporting less than 100 Mbs download and 100 Mbps upload speeds and greater than 100 Mbps download and 20 Mbps upload.
