Please provide your comments in the text box below:

High speed reliable internet is critical to the development of jobs, transportation, industry and business along the US 83 corridor, particularly in rural Scott County. There are options, such as AT&T, but the reliability of this antiquated system has become problematic. Broadband that was once a gift to country households in Scott County (compared to dial-up) is unable to provide the upload and download speeds that families, farmers and feedyards all require to operate effectively and efficiently in today's technologically advanced agriculture industry. Please award IdeaTek the funding to build out the 83 corridor project!

Upload supporting documentation - multiple files should be submitted as a .ZIP file.
