

# **Lasting Infrastructure and Network Connectivity (LINC) Grant Program**

**5/4/23**

# Welcome

- Program Overview
- Broadband Infrastructure Program
- Middle Mile Program
- Internet Exchange Point Program

## The Lasting Infrastructure and Network Connectivity (LINC) Grant Program provides Kansas access to \$25M – \$30M in grant funding

- The LINC Grant Program provides funding for:
  - Broadband infrastructure enabling end user locations with a minimum of 100/20 Mbps speeds
  - Middle Mile infrastructure to reduce overall costs in delivering broadband to end users
  - Internet Exchange Point facilities to improve the overall internet access service quality for all Kansans

*“The investment in Kansas’ broadband infrastructure has been a top priority for me to deliver to the people of Kansas since day one. No one in our state should be without the means to connect to the world – whether it be for business, education or quality-of-life purposes – and this new grant program will help ensure that it happens.” - Governor Laura Kelly*

# Lasting Infrastructure and Network Connectivity (LINC) Grant Program

## Broadband Infrastructure

### Broadband Infrastructure

Funding Available: \$20M - \$25M

Maximum Project Size: \$5M

## Internet Exchange Point and Middle Mile

### Internet Exchange Point

Funding Available: \$5M - \$10M\*

### Middle Mile

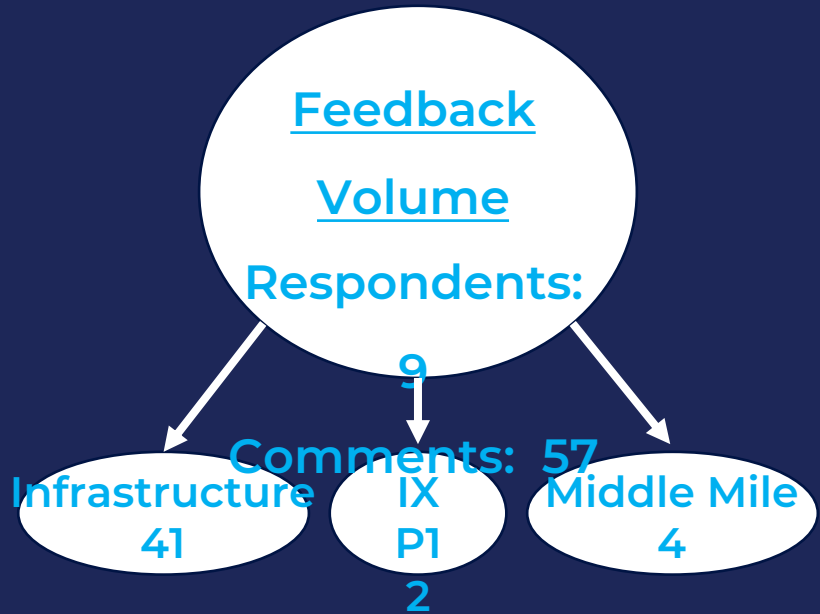

Maximum Project Size: \$5M - \$10M\*

\* - Funding may be directed to either or both programs based on the application candidate pool

# Draft Guideline Feedback - Nothing But The Facts

A Big Thank You For Providing  
Feedback!

Guideline Changes: 18

FAQ Additions: 7

No Changes: 35

# Grant Timeline

Week of:	5/1	5/8	5/15	5/22	5/29	6/5	6/12	6/19	6/26	7/3	7/10	7/17	7/24	7/31	8/7	8/14	8/21	8/28	9/4	9/11	
Week #	1	2	3	4	5	6	7		8	9	10		11	12	13	14	15	16	17	18

- Application Structure, Priorities, Evaluation and Compliance

# Program Overview – Changes From CPF Broadband Infrastructure Program

Program Attribute Changes	CPF	LINC
Program Qualifying Speeds	100/100 Mbps	100/20 Mbps
Price Freeze	3 Years	N/A
Regional Award Distribution	Evaluated	Target Priority
Covered Population	Evaluated	Target Priority
Certified RDOF Areas Available For Award	Evaluated	Investment dependent on service availability, speed and solution
Fiber Based Focus	Yes	Yes + other technologies considered for award
Maximum Grant Award (in millions)	\$10.0	\$5.0
Minimum Unserved Threshold	None	80%
FCC Service Availability Database	Form 477	Broadband Data Collection Fabric and Service Availability Data

- LINC program designed to provide greater flexibility for implementation while focusing the broadband investment where it is needed the most – significantly unserved communities

# LINC Will Fund Projects That:

- Address a critical broadband need of the community to be served
- Contain at least 80% unserved locations within the proposed service area
- Enable access to an affordable and reliable high-speed broadband connection
- Provide a minimum of 100/20 Mbps speed to the end user, with scalability to at least symmetrical 10 Gbps

# Eligible Areas

Recipients may use these funds to make critical investments in broadband infrastructure\*. Critical investments must be directed to unserved areas and meet the minimum unserved threshold to qualify for grant funding

## Unserved

- Unserved: geographic areas with location IDs that are without access to reliable wireline speeds of 100 Mbps download / 20 Mbps upload or greater

## Minimum Unserved Threshold

- Minimum Unserved Threshold: applications must have at least 80% of the location IDs unserved in the proposed service area to be considered (or qualify) for grant funding

**Recipients must invest in broadband infrastructure that addresses a *critical* need for the community**

\*Middle-mile expenses are eligible for grant funding within the Broadband Infrastructure Program only when they are necessary for the provision of last-mile services described in the broadband infrastructure application.

# Rural Digital Opportunity Fund Area Treatment

Areas that have received “final authorization” for RDOF awards will be considered ineligible unless:

RDOF deployment timelines do not align with LINC requirements within twenty-four (24) months

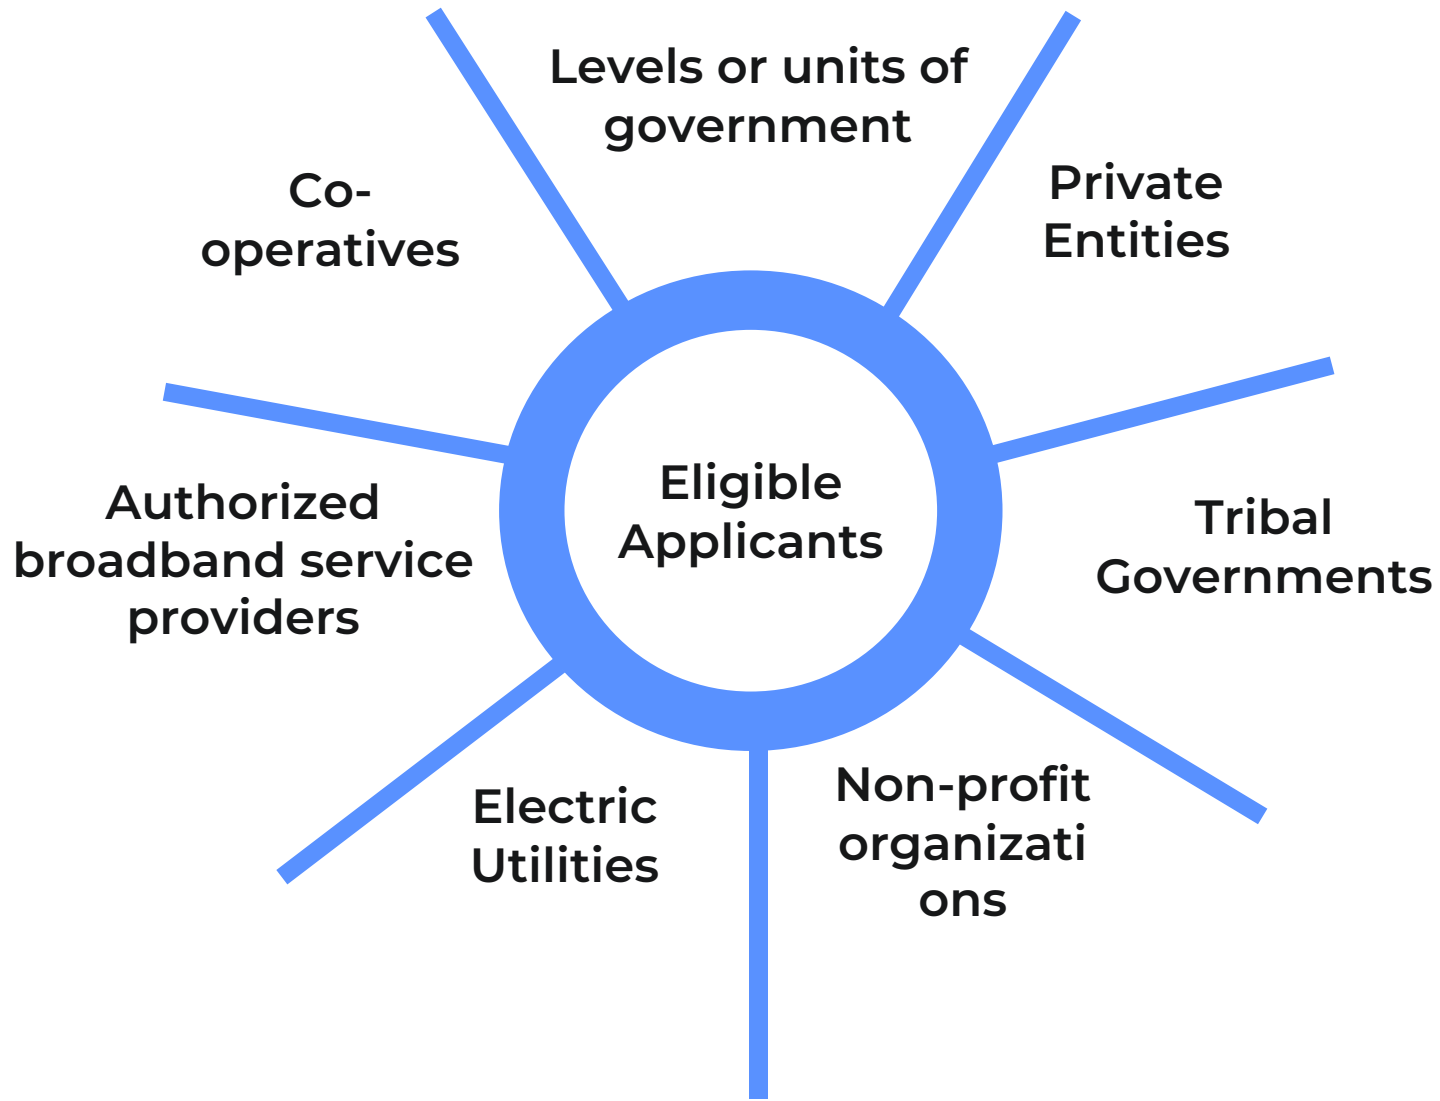

Certified RDOF award does not align with overall LINC program improved service intent

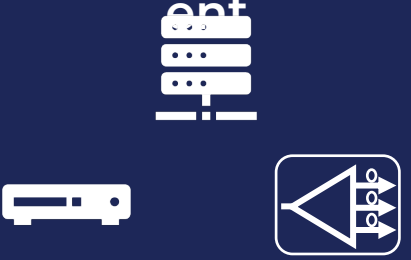

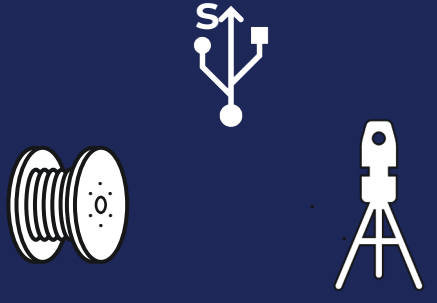

Final determination based on the above criteria, plus if the “final authorized” RDOF footprint investment partially, or fully, benefits the community

# Eligible Applicants

# Eligible Costs

Capital expenses directly related to the deployment of a qualified broadband project, including:

<h3>Pre-Project Development Costs</h3> <p>Limited to 5% cap of grant funds</p>				
 <p>Data gathering</p>	 <p>Feasibility studies</p>	 <p>Engineering design</p>	 <p>Work-related to environmental, historical and cultural review</p>	 <p>Permitting</p>
<h3>Equipment</h3> 	<h3>Supplies</h3> 	<h3>Materials</h3> 		

Costs incurred on or after 3/03/21 are eligible for reimbursement

# Ineligible Costs

## Obligation / Debt Servicing

- Satisfaction of any obligation
- Payment of interest or principal on outstanding debt instruments

## Operational Expenses

- Operating expenses
- Short-term operation leases
- Maintenance expenses related to the project.
- Indirect labor costs (fringe/benefits, travel, meals, lodging, paid time off, etc.)

## Capital Assets / Infrastructure

- Acquisition of spectrum licenses
- Infrastructure not directly connected to service provision for an end-user in the proposed area
- Long-term capital asset purchases/leases, although cost allocation for use during the project period will be considered on a case-by-case basis

# Ineligible Solutions

- **Specific items prohibited in 2 CFR Part 200, 2 CFR 200.216, and 2 CFR 200.471 such as:**
  - contains prohibitions on the use of grant funds to procure or obtain certain telecommunications and video surveillance services or equipment provided or produced by designated entities
  - provides that certain telecommunications and video surveillance costs associated are unallowable

# Economically Distressed Counties

Economically Distressed Counties in Kansas			
Allen	Ellsworth	Lincoln	Riley
Anderson	Finney	Linn	Rooks
Atchison	Ford	Lyon	Russell
Barton	Franklin	Marion	Scott
Bourbon	Geary	Marshall	Seward
Brown	Graham	Mitchell	Smith
Chase	Grant	Montgomery	Stafford
Chautauqua	Greenwood	Morris	Stevens
Cherokee	Hamilton	Morton	Sumner
Clay	Harper	Neosho	Washington
Cloud	Harvey	Norton	Wichita
Cowley	Jackson	Osage	Wilson
Crawford	Jewell	Ottawa	Woodson
Dickinson	Kearny	Pawnee	Wyandotte
Doniphan	Kiowa	Reno	
Edwards	Labette	Republic	
Elk	Leavenworth	Rice	

- 65 economically distressed counties
- Sourced from either the 2020 per capital BEA PCPI or PCMI metric is below the 80% threshold

# Applicant Match

- Applicant match solution based on CPF Broadband Infrastructure Program
- Applicant match solution intended to:
  - Encourage service provider investment
  - Foster high adoption rates
  - Enable service providers to reasonably operate for the long term
  - Sensibly optimize Kansas funding for greatest location enablement
  - Encourage broadband investments in high-cost-to-construct rural areas

# Applicant Match Details

Sliding Scale Match Table	
Cost Per Location Passed	Applicant Match Percentage
\$ 750	86.7%
\$ 1,000	70.0%
\$ 1,500	50.0%
\$ 2,000	40.0%
\$ 2,500	34.0%
\$ 3,000	30.0%
\$ 3,500	28.6%

\$ 16,000	6.3%
\$ 16,500	6.1%
\$ 17,000	5.9%
\$ 17,500	5.7%
\$ 18,000	5.6%
\$ 18,500	5.4%
\$ 19,000	5.3%
\$ 19,500	5.1%
\$ 20,000	5.0%

- Sliding Scale Match provides greater State match where the most help is needed – higher cost areas
- Minimum applicant match is based on cost per location passed - ranges from ~87% to 5%
- Applicant match calculator provided to determine percentage match, only inputs needed are:
  - Total Project Cost
  - Total Locations Passed
- Full table and match calculator published in Program Guidelines

# Applicant Match Calculator Tool

- Applicant match calculator provided to determine minimum percentage match, only inputs needed are:
  - Total Project Cost
  - Total Locations Passed
- Full table and match calculator published in Program Guidelines

## Calculator Tool Provided in Program Guidelines

Determine Applicant Match Value		
Calculation Steps	Action	Values
Step A	Enter Total Project Cost	\$ 500,000 <<< Applicant input
Step B	Enter number of locations passed	200 <<< Applicant input
	Calculated Project's Cost Per Location Passed Amount	\$ 2,500
Step C	Calculated Applicant Match %	34.00%
	<b>Use this amount as the as the minimum required applicant match.</b>	<b>\$ 170,000 &gt;&gt;&gt; Calculated Applicant match</b>

Input project information here

Calculated applicant match here

111421	DSL	1018	DSL	1000	10		
111421	DSL	1019	DSL	1000	10		
111421	DSL	1020	DSL	1000	10		

Polygon Template + Associated Data Files

Name	Type
2022-12-31 BDC Telecom.cpg	CPS File
2022-12-31 BDC Telecom.dbf	DBF File
2022-12-31 BDC Telecom.prj	PRJ File
2022-12-31 BDC Telecom.shp	SHP File
2022-12-31 BDC Telecom.sbx	SXB File

Compare with BDC Service Availability Data (as of 6/30/22)\*

Compares proposed service area Location IDs with BDC service availability data Location ID attributes

Comparison Output

- Proposed service area locations served with 100/20 Mbps (served)
- Proposed service area locations not served with 100/20 Mbps (unserved)
- Degree of Unserved %: locations unserved divided by total locations within Proposed Service Area

\* - If an updated BDC service availability data set becomes available during the evaluation period, it will be used to support the comparison effort if it does not impact the award timeline

# Location ID and Polygon File Submission

- Data set defined in Broadband Data Collection: Data Specifications for Biannual Submission of Subscription, Availability, and Supporting Data” (dated February 7, 2023)
- Service provided data for applications and public commented accepted in two forms:
  - Location ID List Template
  - Polygon Template and Associated Data Set
- Provider Lists by which unserved status Polygon and Interpreted Associated Data Files

Data must be provided for both the application and for the applicant's service area within Kansas

	131425	Verizon		50	100	10	1 B

# Degree of Unserved

- Degree of Unserved (DoU) is the percentage of locations within a defined service area without 100/20 Mbps broadband service
- Calculation reflects the ratio between unserved location IDs vs. total locations IDs within a defined service area as listed below:

$$\text{Degree of Unserved (DoU)} = \frac{\text{Number of Locations IDs without 100/20 Mbps services within the proposed service area}}{\text{Number of Location IDs within the proposed service area}} = \%$$

- A higher DoU percentage for an application reflects a greater broadband need within a community
- Applications with 80% or greater DoU will be considered for grant awards

**Note: Grant funding will not be used to fund applications to create a competitive environment.**

# Other Acceptable Data (Optional)

FCC Broadband Data Collect Service Availability data may contain inaccurate or unvalidated information. Other acceptable data to demonstrate that the proposed service area is, in fact, unserved are:

Speed tests

- Survey or date and time stamped speed test data for a majority of consumers in the designated area

Consumer testimonials

- Testimonials collected within twelve months of the application due date from the majority of consumers (name and address must be included) in the proposed service area
- A copy of submission(s) to the FCC contesting BDC service availability inaccuracies

Service availability

- Documentation from the website of reported service provider stating service is unavailable in this area or for a specific address

Infrastructure data

- Documentation of a lack of infrastructure in an area

# Public Comment Period

The public comment period is intended to:

- ensure transparency and best use of taxpayer funds
- provide an opportunity for providers, elected officials, and constituents to express support or concerns with an application or its proposed service area.

## Public Comment Categories

Service Areas with  
Projects Underway

Service Areas with Projects  
Planned But Not Underway

Service Areas Where  
Broadband Already Exists

Other

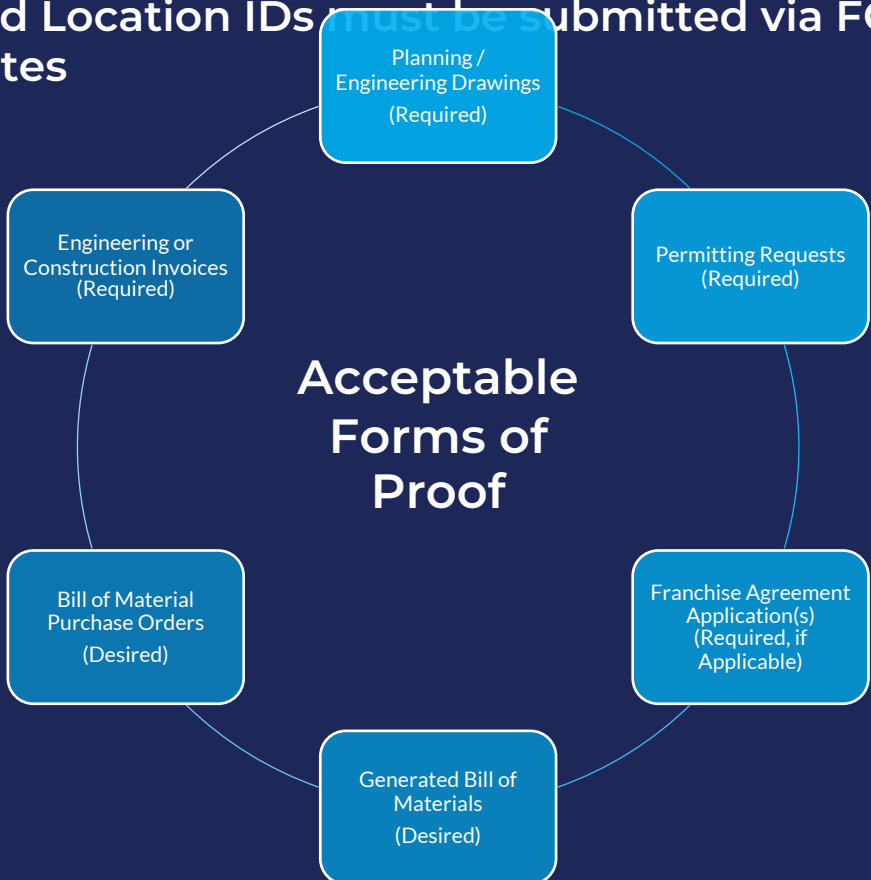

Note: When public comments are accepted against an application, KOBD will use the “Application Overlap” process to determine further application consideration for funding

# Service Areas With Projects Underway

- Public comments shall contain information demonstrating that the provider has begun construction activities.
- The project must provide a minimum of 100/20 Mbps services.
- Challenger must submit proof that work has started on a project to complete broadband infrastructure within applicant's proposed service area.
- Service area and associated Location IDs *must be* submitted via FCC Broadband Data Collection Service Availability templates

# Service Areas With Projects Planned But Not Underway

- The public comment shall contain information demonstrating that the service provider has begun the planning phase of the project.
- If these conditions are met, the KOBD will consider denying the applicant’s proposal.
- If challenge is successful, compliance requirements will be applied.

**Challenger Required Data / Commitment**

100/20 Mbps minimum speed	Proposed service area map in .kmz format
Complete 18 months after grant awards date	Protested locations identified
Funded by “challenger” service provider	Heat maps included in .kmz file (if applicable)

Service area and associated Location IDs must be submitted via FCC Broadband Data Collection Service Availability templates

**Compliance Requirements**

If not complete within 18 months, KOBD reserves the right to:

- ❌ Prohibit challenger from submitting challenges on any future KOBD administered grant applications for two years
- ❌ Prohibit challenger from applying for any grant programs administered by KOBD for the following two fiscal years

# Service Areas Where Broadband Already Exists

- Requires a provider submitting a challenge to provide speed test results in the proposed project area in which the provider submitting the challenge states that broadband service is currently available at minimum speeds of 100/20 Mbps across entire footprint
- Public comment from challenger must include the following information for consideration:

Proof Required	Speed Tests 	Consumer Testimonials 
Requested Data Set	<ul style="list-style-type: none"> <li>• Speed test provider</li> <li>• Downstream speed</li> <li>• Upstream speed</li> <li>• Latency</li> <li>• Physical address</li> <li>• 5% of locations within overlapping area</li> </ul>	<ul style="list-style-type: none"> <li>• Name(s)</li> <li>• Physical Address</li> <li>• Consumers in proposed service area</li> </ul>
Data Set Attributes	<ul style="list-style-type: none"> <li>• Data source and methodology used to develop</li> <li>• Data collected from July, 2022 or later - (opportunity to re-use from CPF program)</li> <li>• Raw data available</li> </ul>	

# Other

Any other feedback that providers, elected officials, and constituents wish to express in support of or to document concerns regarding an application or its proposed service area

## Input Examples

- Effective use of taxpayer funds
  - Cost
  - Procedural
- Project area adjustment
  - Legal

## Claim(s) Assessment

- Evidence examined
- Conduct interview(s) as needed
- Evidence viability determined

## Determination

- Public comment evidence substantiates an application change or not
- Application modification required or not

Degree of impact to previous programs: All “Other” public comments were not accepted in BAG 2.0 and CPF Infrastructure programs – all because of lack of sufficient evidence

# Applicant Response

An applicant response to a public comment is helpful to:

- Acknowledge that the public comment was seen by the applicant
- Enable the applicant to refute the public comment information
- Bring to bear additional information regarding the proposed service area or existing service availability information that was not provided at the time of application

- If there is no applicant response to the public comment:
  - Lends credence to the public comment, high likelihood that contested service area would be de-selected from the application
  - KOBD will only rely on the public comment content to resolve the public comment

- If there is an applicant response, KOBD will use the applicant feedback when resolving the public comment

# Application Overlap

What happens when two or more applications have overlapping proposed service areas?

Evaluate each application on its own merit

In the event of overlapping proposed service areas, the highest scoring application becomes the primary candidate for funding

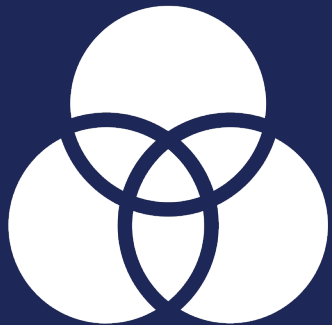

If a scoring tie, the best solution is selected based on overall benefit to the community – speeds available, price points, locations passed, etc.

The lower scoring application is evaluated against remaining application pool, if applicant agrees that the application remains viable after extracting the overlapping location IDs

**Note:**

- Overlapping applications may not be the highest scoring proposals in their peer group
- As such, applicants may never be contacted when an overlapping

# Application Submission Structure

## Project Proposal

- Executive Summary of the Project
- Community Partners, Roles & Letters of Commitment
- Justification for the Project and Economically Distressed
- Adoption, Affordability, and Digital Inclusion Efforts (ACP participation)

## Technical

- Technical Project Summary
- Degree of Unserved
- Network Architecture
- Public and Proprietary Detailed Map of the Proposed Area
- List of Location IDs (application and service provider footprint)
- Project Plan and Milestones
- Long Term Investment Viability

## Financials

- Budget Narrative
- Project Budget Spreadsheet
- Bill of Materials
- Income Statements

# Application Evaluation

<u>Application Section</u>	<u>Sub-Categories</u>	<u>Approximate Weighting</u>
Project Proposal	<ul style="list-style-type: none"> <li>• Project justification</li> <li>• Community benefits</li> <li>• Adoption / Affordability* / Dig. Equity</li> <li>• Partnerships</li> </ul>	35%
Technical Project Plan	<ul style="list-style-type: none"> <li>• Delivered speed</li> <li>• Future proofing / scalability</li> <li>• Proposed service area validation</li> <li>• Locations passed</li> </ul>	50%
Financials	<ul style="list-style-type: none"> <li>• Financial standing of company</li> <li>• Confirming financing is available to support match</li> <li>• Confirming project costs and budget</li> <li>• Applicant Match + Co-</li> </ul>	15%

\* - Affordability comparison baseline is \$60 per month for 100 Mbps service

# Project Priorities

Projects that address critical broadband needs focusing on unserved areas:

# Attestations

- The CPF Infrastructure Program attestations will be carried forward to the LINC Program, with the following additions:
  - The grant applicant agrees that if awarded funds through the LINC program, the grant agreement will be executed within 60 days of receipt from Department of Commerce. If the agreement is not executed within 60 days, the Kansas Department of Commerce reserves the right to reallocate funds.
  - All applicants will be required to sign the Department of Commerce Confidentiality Agreement

# Post Award Compliance

## Compliance

### Monthly Report:

- A narrative update on the status of the project, including notification of any delays.
- Quarterly fund disbursement will be made on expenditure report and supporting documentation
- A monthly budget expenditure report of the project
- A monthly .pdf containing supporting project expenditure documentation for reimbursement re-quested (i.e., Invoices/receipts)

### Closeout Report:

- Validation of broadband infrastructure project
- Location ID data, .kmz maps, speed tests, latency, and network performance validation
- 3<sup>rd</sup> party location enablement validation potential
- Expenditure report and supporting documentation for reimbursement requested (i.e., Invoices/receipts)
- Highlights/Hurdles

# Best Practices For Future Program Applications

- Target Unserved Areas
  - Unserved vs. Underserved – unserved is the priority
  - Trend to continue for the foreseeable future
- Advance Preparation: Get prepared with projects in hand
  - Supporting Documentation Preparation – surveys, testimonials, speed tests to support proposed service area.
- Continued Focus on Economically Distressed Areas
- Ensure Application Information Is Provided
  - Mapping (public and private)
  - Budget and BOM is filled out
    - Speeds: Meet Minimum Program Speeds
- Scalability
  - Fiber based (if required)
  - Capable of 10G or higher
  - Service offerings reflecting symmetric capability
- Align Application Deliverables With Program Priorities
- Pricing
  - Affordability translates to adoption
  - Adoption is the key focus of building the broadband infrastructure

# Middle Mile

# Program Overview and Priorities

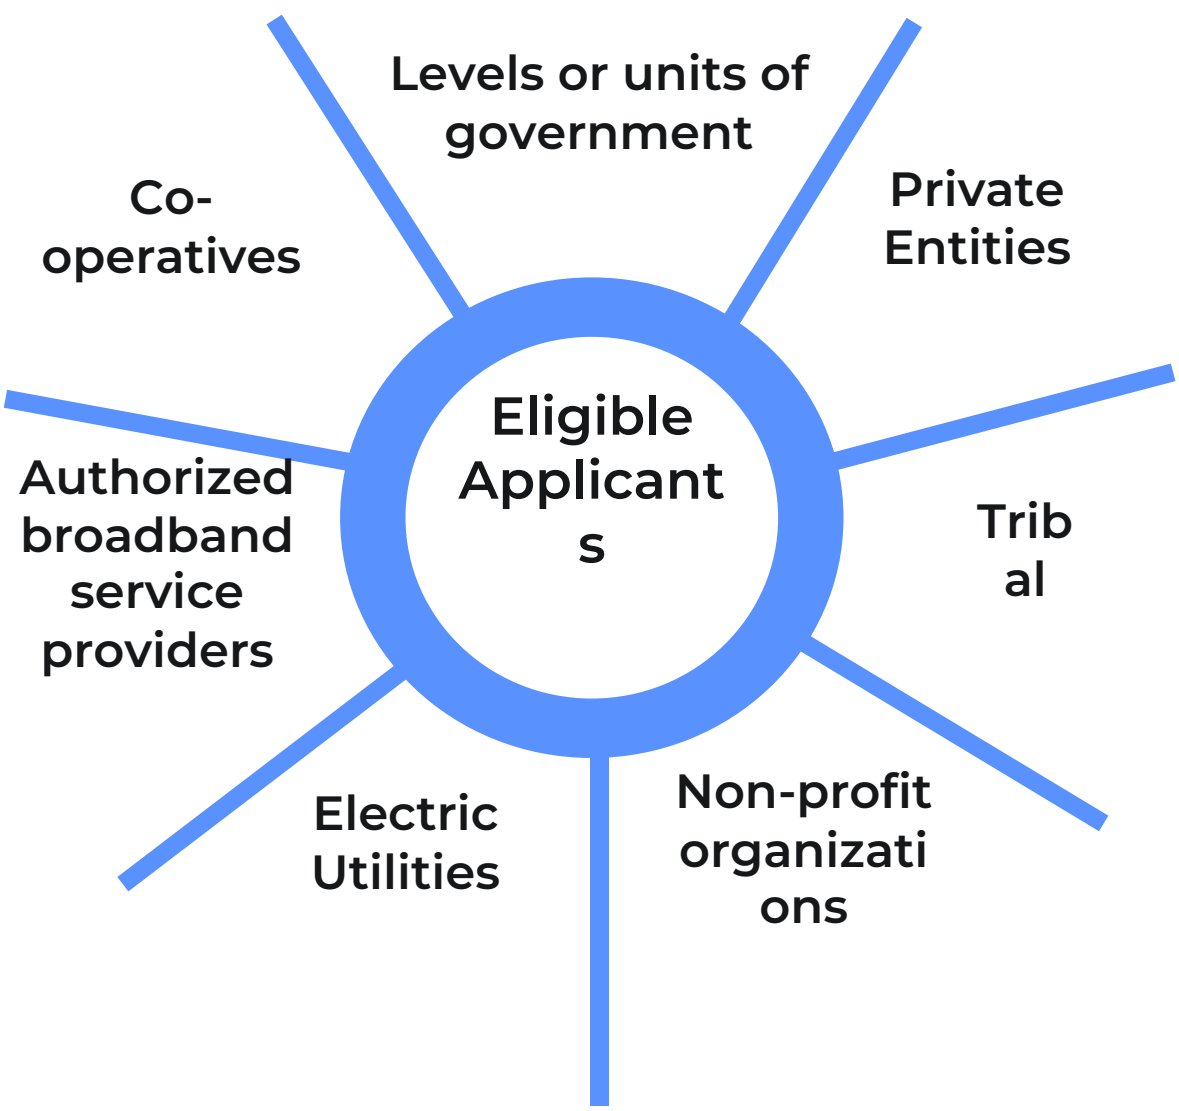

- The intent of this program is to:
  - Reduce transport costs connecting last mile solutions
  - Encourage the expansion of Middle Mile infrastructure to reduce the cost of connecting, in general, unserved and underserved areas to the Internet backbone
  - Promote broadband connection resiliency through the creation of alternative network connection paths
  - Offer access to the funded Middle Mile infrastructure, in perpetuity, on an open access basis
- Funding details:
  - Provides an 80% match for selected projects
  - A total of between \$5M and \$10M is available for one or more projects (total amount shared with Internet Exchange Point Program)

Note: Open access requirements would only apply to the portion funded by the State of Kansas if any project crosses state boundaries

# Eligible Applicants

# Eligible Costs

Capital expenses directly related to the deployment of a middle mile project, including:

### Pre-Project Development Costs

Limited to 5% cap of grant funds. Development costs are eligible under matching funds

Data gathering

Feasibility studies

Engineering design

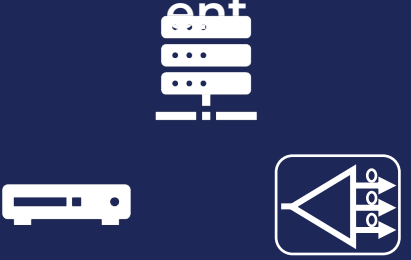

Work-related to environmental, historical and cultural review

Permitting

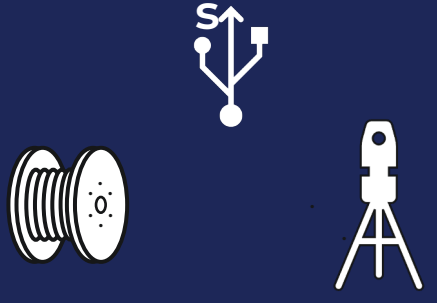

### Equipment

### Supplies

### Materials

Costs incurred on or after 3/03/21 are eligible for reimbursement

# Ineligible Costs

## Obligation / Debt Servicing

- Satisfaction of any obligation
- Payment of interest or principal on outstanding debt instruments

## Operational Expenses

- Operating expenses
- Short-term operation leases
- Maintenance expenses related to the project
- Indirect labor costs (fringe/benefits, travel, meals, lodging, paid time off, etc.)

## Capital Assets / Infrastructure

- Acquisition of spectrum licenses
- Long-term capital asset purchases/leases, although cost allocation for use during the project period will be considered on a case-by-case basis

Note: If the proposed middle mile solution extends beyond State of Kansas geographical boundaries, only the infrastructure placed within the State of Kansas would be eligible for funding through this program.

# Ineligible Solutions

- **Specific items prohibited in 2 CFR Part 200, 2 CFR 200.216, and 2 CFR 200.471 such as:**
  - contains prohibitions on the use of grant funds to procure or obtain certain telecommunications and video surveillance services or equipment provided or produced by designated entities
  - provides that certain telecommunications and video surveillance costs associated are unallowable

# Climate Resistance

Applicants must demonstrate that they have sufficiently accounted for current and future weather and climate-related risks to middle mile infrastructure projects

## Weather Related Risks

## Risk Frequency

## Design and Describe

# Public Comment Period

The public comment period is intended to:

- ensure transparency and best use of taxpayer funds
- provide an opportunity for providers, elected officials, and constituents to express support or concerns with an application

## Public Comment Categories

Middle Mile Projects  
Underway

Middle Mile Projects  
Planned But Not Underway

Areas Where Middle Mile  
Already Exists

Other

# Middle Mile with Projects Underway

- Public comments shall contain information demonstrating that the provider has begun construction activities.
- Challenger must submit proof that work has started on a project to complete middle mile infrastructure with substantial cost reduction benefits compared to existing middle mile infrastructure

# Middle Mile Projects Planned But Not Underway

- The public comment shall contain information demonstrating that the service provider has begun the planning phase of the Middle Mile (MM) project.
- If these conditions are met, the KOBD will consider denying the applicant's proposal.
- If challenge is successful, compliance requirements will be applied.

## Challenger Required Data / Commitment

Funded by "challenger" service provider	Complete 18 months after grant awards date
Cost structure and pricing comparisons	Protested MM segment(s) identified
MM segment map in .kmz format	

If applicant's proposal denied, challenger subject to compliance

## Compliance Requirements

If not complete within 18 months with stated benefits, KOBD reserves the right to:

- ❌ Prohibit challenger from submitting challenges on any future KOBD administered grant applications for two years
- ❌ Prohibit challenger from applying for any grant programs administered by KOBD for the following two fiscal years

# Areas Where Middle Mile Already Exists

Public comment from challenger must include the following information for consideration

Proof Required	Pricing Structure	Middle Mile Segment Comparison
Requested Data Set	 <ul style="list-style-type: none"><li>• Provide existing middle mile pricing structure</li><li>• Explanation on why current solution and pricing structure is sufficient, should not be improved upon or augmented</li></ul>	 <ul style="list-style-type: none"><li>• .kmz map showing current infrastructure overlaid with proposed middle mile project</li><li>• Provide benefit summary of current solution such as speed, scalability, resiliency, communities served, why existing middle mile solution is sufficient for the region / community</li></ul>

# Other

Any other feedback that providers, elected officials, and constituents wish to express in support of or to document concerns regarding an application or its proposed benefits

## Input Examples

- Effective use of taxpayer funds
  - Cost
  - Procedural
- Project area adjustment
  - Legal

## Claim(s)

### Assessment

- Evidence examined
- Conduct interview(s) as needed
- Evidence viability determined

## Determination

- Public comment evidence substantiates an application change or not
- Application modification required or not

# Applicant Response

An applicant response to a public comment is helpful to:

- Acknowledge that the public comment was seen by the applicant
- Enable the applicant to refute the public comment information
- Bring to bear additional information regarding the Middle Mile solution or existing service availability information that was not provided at the time of application

- If there is no applicant response to the public comment:
  - Lends credence to the public comment, high likelihood that contested application or a portion of the application would be de-selected from the program
  - KOBD will only rely on the public comment content to resolve the public comment

- If there is an applicant response, KOBD will use the applicant feedback when resolving the public comment

# Application Submission Structure

## Project Proposal

- Executive Summary of Project
- Justification of the Project
- Cost Structure / Affordability
- Community Partner Involvement

## Technical

# Project Priorities

Projects that address lack of middle mile or high-cost middle mile preventing last mile broadband expansion

\* - Note: See Appendix for Economically Distressed County List and definition.

# Attestations

- The CPF Infrastructure Program attestations will be carried forward to the LINC Program, with the following additions:
  - The grant applicant agrees that if awarded funds through the LINC program, the grant agreement will be executed within 60 days of receipt from Department of Commerce. If the agreement is not executed within 60 days, the Kansas Department of Commerce reserves the right to reallocate funds.
  - All applicants will be required to sign the Department of Commerce Confidentiality Agreement

# Post Award Compliance and Accountability

## Compliance

### Monthly Report:

- A narrative update on the status of the project, including notification of any delays.
- Quarterly fund disbursement will be made on expenditure report and supporting documentation
- A monthly budget expenditure report of the project
- A monthly .pdf containing supporting project expenditure documentation for reimbursement re-quested (i.e., Invoices/receipts)

### Closeout Report:

- Validation of Middle Mile infrastructure project
- Route segment completion, .kmz maps, throughput tests, latency, and network performance validation
- Expenditure report and supporting documentation for reimbursement requested (i.e., Invoices/receipts)
- Highlights/Hurdles

**Let's Talk.**

# Internet Exchange Point

# Program Overview and Priorities

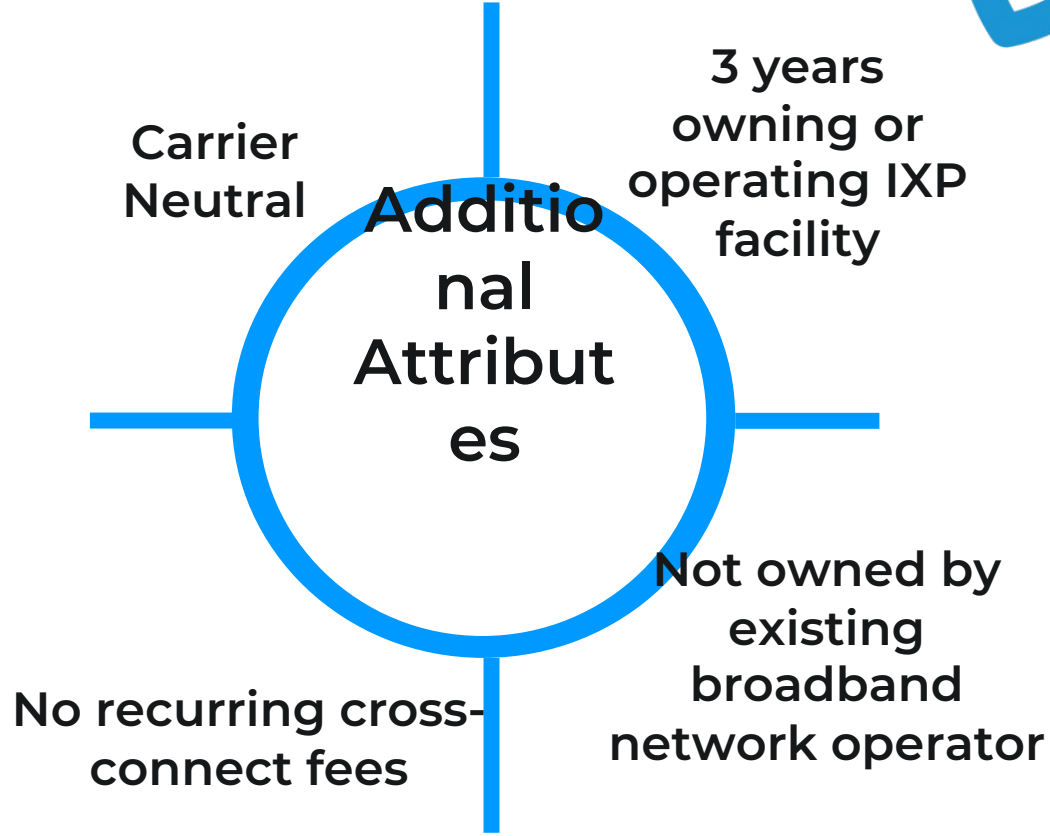

Purpose of the program is to improve the broadband end user experience through faster and more resilient connectivity via a facility that:

- Must physically reside in the State of Kansas
- Can be a new or an augmentation to an existing facility
- Public, private and government entities must be able to purchase IXP services from selected grantee(s)
- Is carrier neutral
- Not owned by existing broadband network operator
- Commits to not charging monthly recurring cross-connect fees
- Has demonstrated professional experience owning or operating IXP facilities (a minimum of three years)

## Funding Details:

- Provides a 75% match for selected projects
- A total of between \$5M and \$10M is available for one or more projects (total amount shared with Middle Mile Program)

# Eligible Applicants

# Eligible Areas

Anywhere inside the Kansas  
state boundaries

Helpful for the facility to be placed where  
there is access to a fiber rich  
environment

# Eligible Costs

Capital expenses directly related to the deployment of a qualified Internet Exchange Point solution, including:

**Pre-Project Development Costs**

Limited to 5% cap of grant funds; remaining pre-project development costs are eligible under matching funds

Data gathering

Feasibility studies

Engineering design

Work-related to environmental, historical and cultural review

Permitting

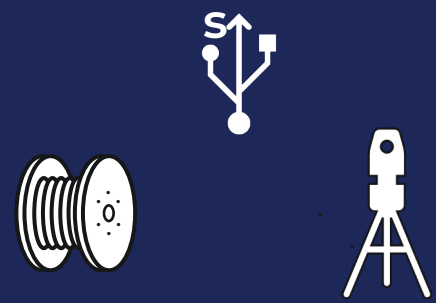

**Equipment**

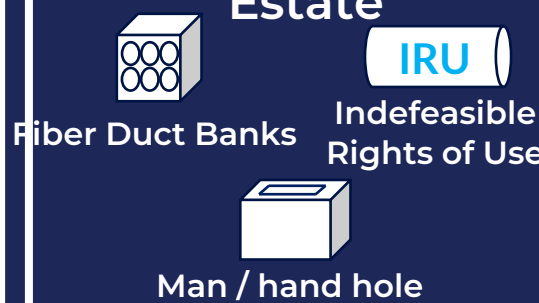

**Supplies**

**Materials**

**IXP Real Estate**

Costs incurred on or after 3/03/21 are eligible for reimbursement

# Ineligible Costs

## Obligation / Debt Servicing

- Satisfaction of any obligation
- Payment of interest or principal on outstanding debt instruments

## Operational Expenses

- Operating expenses
- Short-term operation leases
- Maintenance expenses related to the project
- Indirect labor costs (fringe/benefits, travel, meals, lodging, paid time off, etc.)

## Capital Assets / Infrastructure

- Infrastructure not directly connected to enabling the IXP solution
- Long-term capital asset purchases/leases, although cost allocation for use during the project period will be considered on a case-by-case basis (minus IRUs)

# Ineligible Solutions

- New or augmented enterprise data centers

- Specific items prohibited in 2 CFR Part 200, 2 CFR 200.216, and 2 CFR 200.471 such as:
  - contains prohibitions on the use of grant funds to procure or obtain certain telecommunications and video surveillance services or equipment provided or produced by designated entities
  - provides that certain telecommunications and video surveillance costs associated are <sup>64</sup>unallowable

# Public Comment Period

The public comment period is intended to:

- ensure transparency and best use of taxpayer funds
- provide an opportunity for other IXPs, carriers, elected officials, and constituents to express support or concerns with an application

## Support

## Concern

# Applicant Response

An applicant response to a public comment is helpful to:

- Acknowledge that the public comment was seen by the applicant
- Enable the applicant to refute the public comment information
- Bring to bear additional information regarding the proposed service area or existing service availability information that was not provided at the time of application

- If there is no applicant response to the public comment:
  - Lends credence to the public comment, high likelihood that contested application or portion of the application would be de-selected from the program
  - KOBD will only rely on the public comment content to resolve the public comment

- If there is an applicant response, KOBD will use the applicant feedback when resolving the public comment

# Application Submission Structure
