Please provide phone number (not required) *n/a*

Are you responding on behalf of an organization? **No**

Organizational affiliation (If applicable) *n/a*

The Kansas Office of Broadband Development (KOBD) is in the process of developing its BEAD Initial Proposal as required by the NTIA. This initial plan is divided into Volume 1 and Volume 2. Volume 1 includes initial identification of unserved and underserved locations, definition of community anchor institutions, proposed pre-challenge process location modifications, and the model challenge process. Please use this link to review the entire Initial Proposal Volume 1 document, and feedback on Volume 1 will be captured in the text boxes below. The comment portal will be open from August 1, 2023 through August 30, 2023. KOBD will then review all feedback and submit the Initial Proposal to the NTIA. To access a full copy of Volume 1 of the BEAD Initial Proposal along with accompanying documents, please use the links below:

I am responding to comments related to the following Volume 1 requirements **Requirement 5: Identification of existing unserved and underserved broadband locations**

Comments relating to Requirement 5: Identification of existing unserved and underserved broadband locations

I live off the south end of Lone Star Lake, just south of Lawrence, KS. It's a mere 20-30 minute drive from KU. My options for internet are ViaSat, Hughes Net, Starlink, or a hot spot. I work from home and with the limited data and speeds on each option we have to make the choice of me and my work needs or my son being able to do homework. Having high speed broadband options would be a game changer as currently he has to either stay after school or, I have to "leave" work early to allow him internet time.
