Broadband, Equity, Access,
and Deployment (BEAD)

Energy

Preventing Outages and
Enhancing the Resilience of the
Electric Grid - Section 40101(d)
Grid Resilience and Innovative
Partnerships (GRIP)

Technical Assistance

Bipartisan Infrastructure Law (BIL)

BIL is shorthand for the Bipartisan Infrastructure Law and is also known as the Infrastructure Investment and Jobs Act (IIJA). IIJA was the original package presented to Congress. When it passed out of Congress and went to the President's desk for signature in November 2021 it became BIL. BIL and IIJA are used interchangeably but mean the same thing.

The total investment across the United States is \$1.2 trillion and includes 400 formula and discretionary (competitive) grant programs across 12 federal agencies. 40% is expected to be discretionary grant programs with specific federal priorities and requirements.

BIL supports investments in transportation, energy and power, broadband, cybersecurity, water and sewer, and resilience.

Kansas Infrastructure Hub

The Kansas Infrastructure Hub is Kansas' coordinated approach to working to identify best practices from across the nation for deploying funds and maximizing Kansas' BIL opportunities.

The Hub is composed of a state agency steering committee that has been established and includes representatives from the Kansas Departments of Administration, Agriculture, Commerce, Health and Environment, and Transportation, as well as the Division of Emergency Management, Kansas Corporation Commission, and Kansas Water Office.

Build Kansas Fund

The Hub also serves as the coordinator for the Build Kansas Fund (BKF), which is making \$200M available to applicants seeking assistance in securing the cost-share or local match requirement for a BIL funded program. The BKF will be available through Fiscal Year 2027, or until all funds have been committed. Applications are accepted through the Hub's website and reviewed on a rolling basis. For additional information or assistance with your Build Kansas Fund application, please email BIL@ks.gov to be connected with your regional contact or submit a request on the website at kshub.org.

Technical Assistance & Training

How can the Hub help my project?

- Identifying opportunities in BIL
- Explaining technical information
- Building partnerships and engaging stakeholders
- Developing funding strategies

What types of services does the Hub provide?

- BIL Discretionary Program Education
- BIL Grant Research & Pursuance
- Determining Entity & Project Eligibility
- Innovative approaches to community resiliency
- Understanding Scoring Criteria
- Project Planning
- Grant Coaching
- Application Review
- Compliance & Reporting

Who provides the technical assistance?

The Kansas Infrastructure Hub assigns a dedicated grant professional to each region of the state plus other technical experts as needed.

How can my project or community get Hub assistance?

To connect with one of our regional contacts, email BIL@ks.gov or submit a request on the website at kshub.org.

What to consider when requesting Hub assistance?

Services available through the Hub, including the Build Kansas Fund, must be aligned with a BIL grant program. Funding deadlines can be tight so be prepared to dedicate time and resources alongside the Hub. Establishing partnerships and stakeholder engagement takes time. Have those conversations early and often, bringing stakeholders to the table with the Hub as appropriate.

We're stronger when we work together, especially when it comes to infrastructure.
