

PROJECT BRIEF

Project Name: Washburn Tech Manufacturing Training Center

Grant Program: Legislative

Project Date: Jul 2022 - Aug 2025

Project Summary

Washburn Tech's project established a state-of-the-art Manufacturing Training Center that will significantly expand educational capacity and modernize training resources to meet the needs of Kansas's rapidly evolving manufacturing sector.

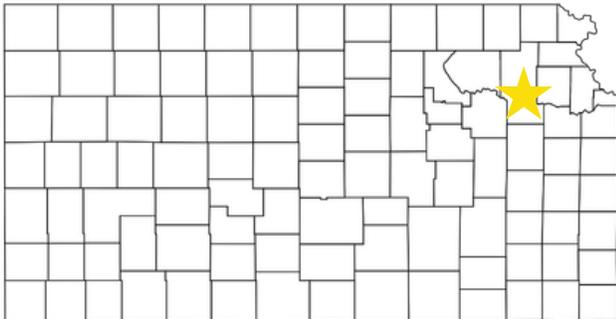

Goals and Objectives

Goal: To expand and enhance post-secondary educational access in the manufacturing field.

Objective: Construct a new manufacturing facility that houses modern labs, classrooms, and instructional spaces.

Location

Topeka, Kansas

Budget Overview

- **Grant:** \$1,843,594
- **Match:** \$1,843,594
- **Total Budget:** \$3,687,188

Expense Categories:

- **Land Purchase:** \$2,008,521
- **Construction:** \$852,205
- **Equipment:** \$801,412
- **Consulting:** \$25,050

Grantee Information

Washburn Tech has a unique affiliation with Washburn University that allows for a seamless transition to advanced degrees and creates a rich environment for students.

Target Population

The project primarily serves students entering the manufacturing field, including traditional and non-traditional learners.

Sustainability

Washburn Tech will attain sustainability through revenue generated from student enrollment within the manufacturing program, grants, and overall college income to support on-going sustainability and maintenance.

Activities and Timeline

2023:

- Purchase of land completed

2024:

- Site work and Construction completed

2026:

- Final completion of Training Center through further investments

Outcomes

This state-of-the-art facility will enable Washburn Tech to increase classroom capacity and provide more in-person training programs focused on the agricultural sector.
